

WHERE: Jamaica, from Yameco, 'beaver' in the Native American Lenape language, is not only one of the original counties of New York, but also the first village to become part of the United States. The Hillside Hotel raises along Queens Boulevard, close to the heart of New York and to the JFK International Airport.

SALES AGENT: Mikhail Starobinets (AF Supply)

CONTRACTOR: Chico's Plumbing

THE REQUEST

This brand new hotel, one of the premier hotels in the borough of New York, has chosen DAB: with its 5 floors and 49 rooms, it needed a booster set which could respond to the pressurization requirements of the system. The choice has fallen upon the Esybox (two units were included in the project).

Why this choice? Esybox is a complete booster system which is specifically fit for residential building service.

2 x esybox
