

Mestrino, October 20th 2021

As highlighted by the screen shots taken from the official CENELEC website and indicated below, we highlight that:

The standard EN 55014-2: 2015 has since 25-03-2018 passed the 1997 edition (dow indicated);
The EN 55014-2: 2015 standard meets the essential requirements of the EMC directive 2014/30 / EU (legal).

For the above, we confirm that we, and the external part body that released the conformity report, used this standard for the CE marking of our devices even if not yet reported in the official gazette.

We also remember that the directives indicate the standards as one of the tools for the fulfillment of the essential requirements and not as the only means
