ELECTRONIC BOOSTER SET

# ESYBOX MAX

## ELECTRONIC BOOSTER SET

### TECHNICAL DATA

**Flow rate:** up to 17,4 m<sup>3</sup>/h (For single unit)  
**Head:** up to 96 m  
**Type of pumped liquid:** clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral  
**Liquid temperature:** +50°C  
**Maximum ambient temperature:** +55°C  
**Maximum inlet pressure:** 5 bar  
**Operation pressure:** 12 bar / 1200 kPa  
**Maximum differential pressure:** 9,4 bar (85/120); 6,7 bar (60/120); 5,7 bar (45/120)  
**Constant pressure range:** 1-12 bar (3 bar by default)  
**Maximum suction height:** 4 m (with bottom valve)  
**Motor protection class:** IP X5  
**Motor insulation class:** F  
**Impeller material:** technopolymer with steel wear rings  
**Single phase power input:** 208-240V 50/60Hz  
**Three phase power input:** 380-480V 50/60Hz  
**Type of installation:** fixed in vertical position  
**Certification:** WRAS, ACS, NSF61

Integrated pumping system for pressurization in commercial building service. Available in three power sizes, it consists of modular elements that allow different configurations to cover the needs of medium/large condominiums and high buildings (even over 14 floors).

Each unit consists of the single, double or triple connection base and the pumping units; a four-pumps system is available with the additional kit to connect two double bases.

The modular construction allows to assemble the pumping groups directly at the installation site (OSA - On Site Assembly).

The silence and compactness of dimensions allow installation in all rooms, even inhabited.

### CONSTRUCTION FEATURES OF THE PUMP

Electronic vertical multi-impeller pump, with display, pressure sensors on intake and delivery, non-return valve on delivery and an integrated expansion tank. Technopolymer pump body, technopolymer impeller with steel wear rings, steel jacket.

### CONSTRUCTION FEATURES OF THE MOTOR

Water-cooled permanent magnet motor, stainless steel motor jacket. Motor shaft in AISI 303 stainless steel. The efficiency is comparable to the IE5 efficiency class (according to internal laboratory tests).

### CONSTRUCTION FEATURES OF THE ELECTRONIC

The variable frequency drive keeps the pressure constant by varying the number of motor revolutions according to the request.

There is a large display for the configuration and control.

The expansion module (Esy I/O, available as an accessory) makes it possible to interface EsyBox Max with the other elements of the system (BMS - Building Management System).

Integrated protections: protection from dry running, amperometric and abnormal voltages, overheating, freezing, anti-blocking and anti-cycling.

### H<sub>2</sub>D

It is possible to configure and view the operating parameters on the large EsyBox Max display or thanks to the H<sub>2</sub>D app and the integrated Wi-Fi module, it is possible to do it remotely with an active H<sub>2</sub>D service (an Internet connection is required).

From a smartphone or a tablet it is possible to control and manage system pressure, alarms and check the instantaneous and historical consumption.

With DSync technology, the user experience of EsyBox Max is simplified. Using their smartphone or tablet, the installer interfaces with the pump that automatically detects the language, the time and the unit of measurement used in the Country of installation. In the case of a booster set, once the installation of the first pump is completed, the EsyBox Max automatically synchronize the other pumps.

### MATERIALS

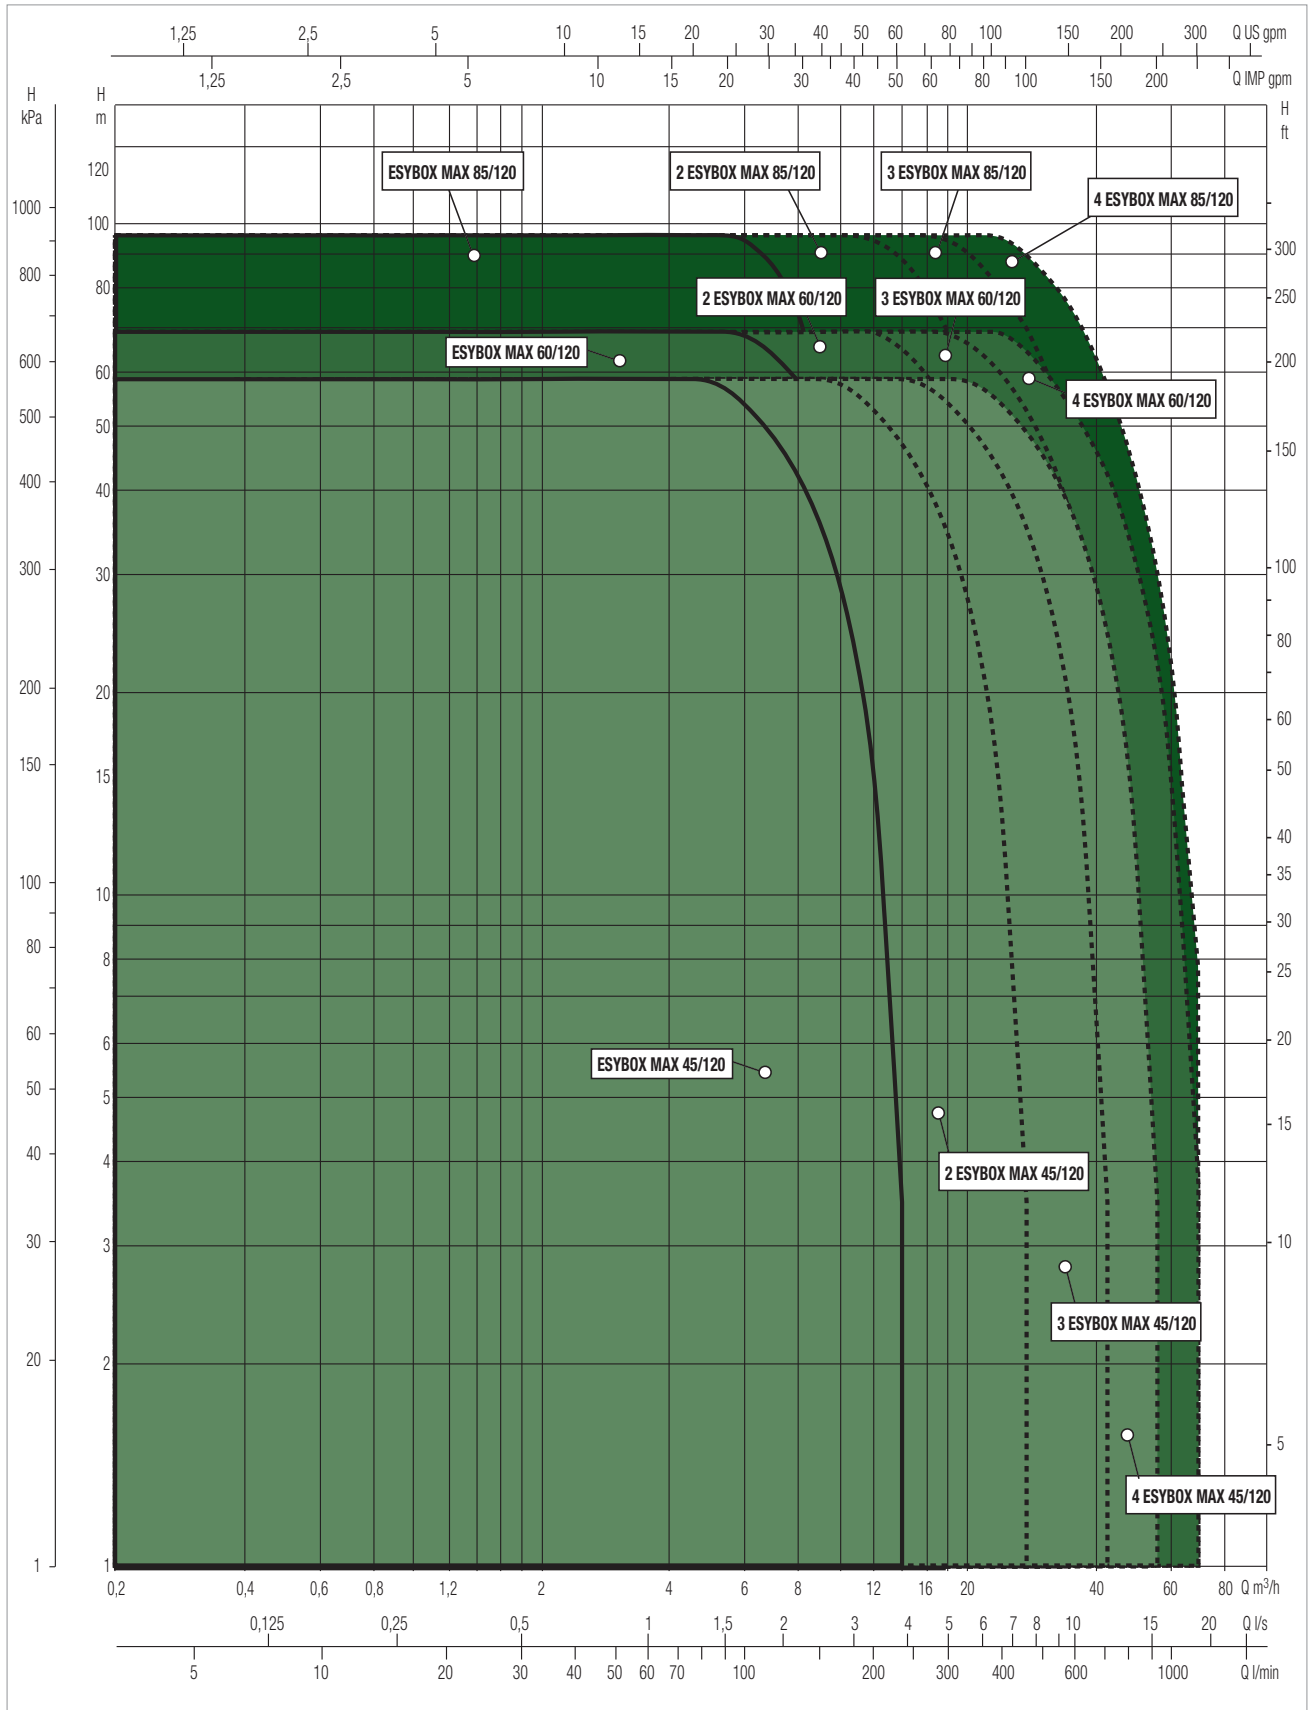

N°	PARTS	MATERIALS
1	FITTING	TECHNOPOLYMER PA66 30%GF
2	MANIFOLD	AISI 304 STEEL

	<p><b>COLUMN KIT</b></p> <p>Column for mounting the electrical panel directly on the frame of the multi-pump system.</p>		●	●	● 2 x
	<p><b>JOINT KIT 2 X 2 ESYBOX MAX</b></p> <p>Kit consisting of 2 pieces of 3-pieces unions and 2 pieces of 2" nipples to connect the delivery and suction of a pair of 2 EsyDock Max to create 4-units EsyBox Max groups.</p>				●

	DESCRIPTION
 <p>23 x 38 x 38 cm</p>	<h3>ESYDOCK MAX</h3> <p>EsyDock Max is the mounting base to assemble the pumping system at the installation site quickly and conveniently. It connects to the system with four different hydraulic configuration modes and with its anti-vibration feet it maintains a high level of quietness.</p>
 <p>23 x 81 x 38 cm</p>	<h3>2 ESYDOCK MAX</h3> <p>It is the mounting base used to create two-pump units. The exceptional performance offered by the combined operation of two EsyBox Max units is combined with a 50% reduction in dimensions compared to conventional systems with the same performance.</p>
 <p>23 x 125 x 38 cm</p>	<h3>3 ESYDOCK MAX</h3> <p>Mounting base for three-pump units. The modular concept is realised in an absolutely flexible, high-performance system. Maximum results with minimum space requirements and extremely easy and user-friendly installation.</p>

#### EASY TO MOVE & INSTALL

Keeping it flexible, we have the On-Site Assembly concept. So if you have difficulties getting to the pumps location, due to narrow stairways and corridors etc., you can choose to assemble your booster on-site which will only require moving smaller lighter boxes into the location then carry out our quick assembly steps.

#### AS QUICK AS A "CLICK"

Install EsyDock into your pipework system and simply "plug" your pumps in. A final quick set up via the digital H<sub>2</sub>D app completes your installation project.

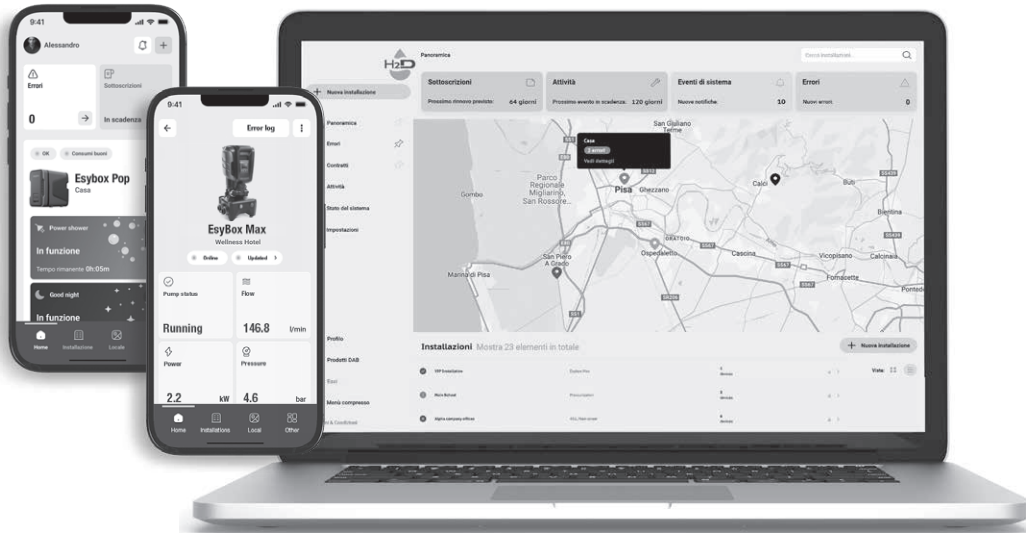

# H<sub>2</sub>D DIGITAL SERVICE

THE SMART PLATFORM FOR MANAGING DAB DEVICES REMOTELY

**H<sub>2</sub>D IS THE DAB PLATFORM - AVAILABLE ON MOBILE AND DESKTOP - THAT PAIRS WITH LATEST-GENERATION DAB DEVICES TO SHOW YOU WHAT'S GOING ON INSIDE YOUR SYSTEMS.**

It allows you to configure your pump and optimise its operation remotely, saving time, resources and money.

Ideal for anyone seeking to future-proof their business with solutions designed to improve processes, offer more service, and be environmentally responsible.

## H<sub>2</sub>D FOR PROFESSIONALS

H<sub>2</sub>D simplifies and streamlines work routines, allowing for precise configuration of all parameters.

## SEE THE FUTURE OF YOUR BUSINESS THROUGH A NEW LENS

Desktop and mobile solutions work together seamlessly. With user-friendly access on your smartphone, it's never been easier to communicate with pumps on site or keep an eye on your systems from anywhere. From your desktop, you can dive deeper into data analysis. You can easily enhance workflow, improve customer service, and grow your business.

### OPTIMISE TIME AND WORK

H<sub>2</sub>D allows systems to be controlled remotely and, where needed, work on site is easier to plan.

### PROBLEM FIXED FIRST TIME, EVERY TIME

H<sub>2</sub>D provides all the info you need to prepare the job beforehand for a quick and permanent fix, so the technician can get everything done in one go.

### LITTLE OR NO DISRUPTION

Remote monitoring allows you to address potential issues and prevent disruptions.

### MORE SERVICE AND LESS URGENT CALLOUTS = INCREASED PROFIT

With remote monitoring, we offer a 24/7 service that includes preventive maintenance services, helping to avoid emergencies.

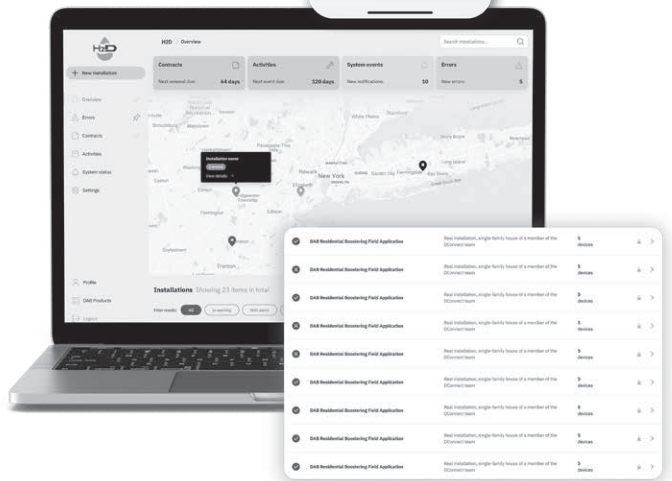

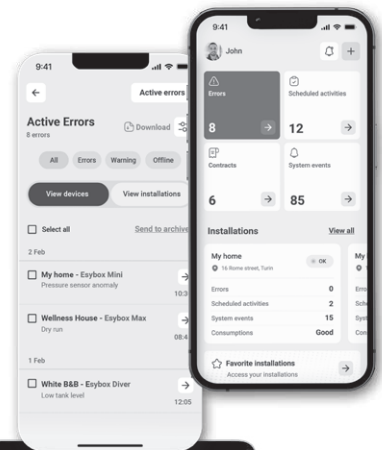

### SATISFIED CUSTOMERS

With parameters optimised remotely, the system ensures consistently smooth operation.

### FROM DCONNECT TO H<sub>2</sub>D

H<sub>2</sub>D replaces and improves on DConnect. Latest generation DAB products connect effortlessly to H<sub>2</sub>D.
