FEKA VS

NO. 1 FOR RELIABILITY.
EVERY TIME, IN EVERY SITUATION

FOR WORRY-FREE
WASTEWATER HANDLING

Feka VS is DAB's new-improved submersible pump for handling wastewater in domestic/residential and commercial settings, made entirely from stainless steel.

FEKA VS

WORRY-FREE WASTEWATER HANDLING

We've taken all our market experience and poured it into the redesign of the FEKA VS range of submersible wastewater pumps: new features and capabilities to tailor it even more closely to user demands.

BUT DON'T WORRY: WE'VE BARELY CHANGED A THING...

With its full stainless steel construction and 50 mm free passage, Feka VS has all the same reliability and performance of a tried-and-tested product with a 30-year track record.

...JUST TWEAKED WHAT NEEDED TWEAKING

The **optimized hydraulic** design has meant an overall increase in efficiency, resulting in reduced consumption for the same performance; pump size has been kept small, so it can cater to different requirements, giving the range greater versatility when it comes to installation and maintenance, as well as system design.

For example, the more **compact design** means it can be installed in smaller wells, while the reduced weight makes it easier to handle and the submersible motor overheats less, resulting in longer product service life.

We've even come up with a new model: with the addition of Feka VS 1500, we've extended the performance range to cater to demands for increased performance, such as in larger buildings or in older systems, with pipework that may be partially blocked.

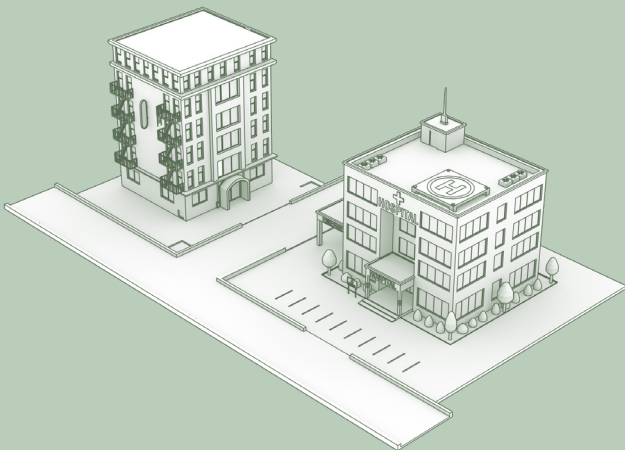

OPTIMIZED HYDRAULIC
FOR SUPERIOR EFFICIENCY

GREATER COMPACTNESS AND REDUCED WEIGHT
COMPARED TO THE PREVIOUS VERSION

NEW 1500 SIZE
FOR A WIDER PERFORMANCE RANGE

APPLICATIONS

The FEKA VS units are designed for domestic/residential and commercial applications.

They can be used in tanks for residential wastewater or for handling municipal wastewater.

In commercial settings, they are suitable for offices, shopping centres, restaurants or tourist facilities, such as small campsites.

FEKA VS

A SOLUTION FOR EVERY USER

DISTRIBUTOR

END USER

Here at DAB, we're always thinking about the specific needs of each individual user. This is why we have a solution for every problem.

HIGH-EFFICIENCY HYDRAULICS

The dimensions might be small, but the free passage still measures 50 mm, meaning Feka VS still offers the same excellent performance, while significantly reducing energy demand.

THE POWER OF STAINLESS: STAINLESS STEEL PUMP CASING AND IMPELLER

With its full stainless steel construction, it ensures unrivalled reliability and (virtually) endless service life!

THE IMPORTANCE OF DETAILS: NEW HANDLE AND FLOAT RETAINER

Redesigned to better cater to every demand: it makes the job of installing and servicing the pump that much easier.

TO SUM UP:

1) Reduced consumption, with the same performance you've come to expect

2) Peace of mind: with full stainless steel construction and 50 mm free passage, it offers ruggedness, long service life and high performance

3) Fully compliant:
EN 12050-2 certification

FEKA VS

ACCESSORIES

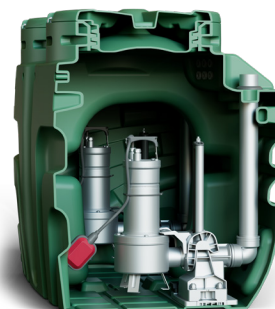

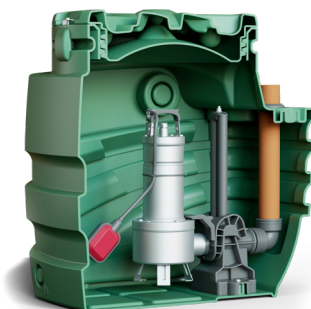

EBOX

Ebox is an electronic control panel for the protection and automatic operation of one or two electronic pumping stations of filling or emptying the drainage of rainwater or waste water in general, in residential, civil and industrial environments.

NGPANEL

NgPanel is an electronic control panel designed to manage and protect 1 or 2 pumps in wastewater lifting stations for commercial and residential buildings. Ideal for filling and emptying operations, monitor water levels in tanks or wells in real time, control the automatic starting and stopping of the pumps, provide thermal overload protection for the motor, and give the option of controlling the system's operation remotely.

FEKABOX E FEKAFOS

Tanks for domestic waste water arriving from drainage systems of various types or storm drains, for systems located below the sewer network such as garages or basements, when the sewers cannot be reached by gravity. The pump installed in the tank allows the waters to be conveyed into the sewer. The tank has numerous possibilities for connecting pipes at input, output and ventilation, allowing adequate use even in limited spaces

FEKA VS			
FLOW RATE	Da 3 m ³ h a 39 m ³ h	DELIVERY DIRECTION	Horizontal
HEAD	17 m	IMPELLER	Stainless steel vortex
PUMPED LIQUID	Sewage and general wastewater, non-aggressive.	PROTECTION DEGREE	IP 68
FREE PASSAGE	50 mm	THERMAL CLASSIFICATION OF MOTOR INSULATION	F
LIQUID TEMPERATURE RANGE	0°C to +35°C for domestic use; 0°C to +50°C for other uses.	POWER CABLE	H05RN-F
OUTLET	Threaded 2" GAS.	POSSIBLE INSTALLATION TYPES	Fixed or portable in vertical position
		MAXIMUM IMMERSION	7 meters
